NTA Scores are normalized scores across multi-shift papers and are based on the relative performance of all those who appeared for the examination in one shift. The marks obtained are converted into a scale ranging from 100 to 0 for each shift.

Note:

- The NTA score is not the same as the percentage of marks obtained.
- The NTA Score indicates the percentage of candidates who have scored EQUAL TO OR BELOW (same or lower raw scores) a particular candidate in that shift.
- The NTA scores of a Candidate have been calculated as follows:

$$100 \times \frac{\text{Number of candidates appeared in the 'Shift' with raw score EQUAL TO OR LESS than the Score of the candidate in the Shift}}{\text{The total number of candidates who appeared in the 'Shift'}}$$
- Total NTA Score is NOT an aggregate or average of the NTA Score of an individual subject.
- The candidate's particulars including Category and Persons with Benchmark Disabilities (PwBD) have been indicated as mentioned by the candidate in the online Application Form.
- After the JEE (Main)- 2026 Session 2, the ranks of the candidates will be released taking into consideration the best of the two NTA Scores in total and in accordance with the policy already made available on the website <https://jeemain.nta.nic.in/>.
- This electronically generated Scorecard is the official Scorecard published by the NTA.
- The National Testing Agency has taken due care while uploading the Score Card. However, in case of any inadvertent error, the NTA reserves the right to rectify the same at a later stage.
